Pre-cleaning
Data Profiling Report

Purpose

Describe the size, structure, and observable data-quality risks in the source data before cleaning. This profile covers the sheets **in**, **inventory_daily**, **purchase_orders**, and **patient_cases**.

At a glance

Sheet	Data rows	Columns	Rows with missing values	Key duplicate extras
in	46	37	18 / 46	0 on id
inventory_daily	10,793	20	3,111 / 10,793	162 record_id; 217 natural-key extras
purchase_orders	2,187	12	204 / 2,187	24 on po_id
patient_cases	5,665	15	1,085 / 5,665	67 on case_id

Rows with missing values counts distinct records with one or more blank cells. Duplicate extras are repeated records beyond the first occurrence. The inventory natural key is hospital + item + date.
